

The impact of regulations within AI Adoption process

Dr. Marco Lützenberger
22nd November 2021, KI-Fachkonferenz

AI – World's most disruptive technology

Global GDP could be up to 14% higher in 2030 as a result of AI

 \$15.7 trillion

The AI Adoption Problem

Amortization Rate of AI Prototypes is all but convincing

A typical Chat-Bot Solution

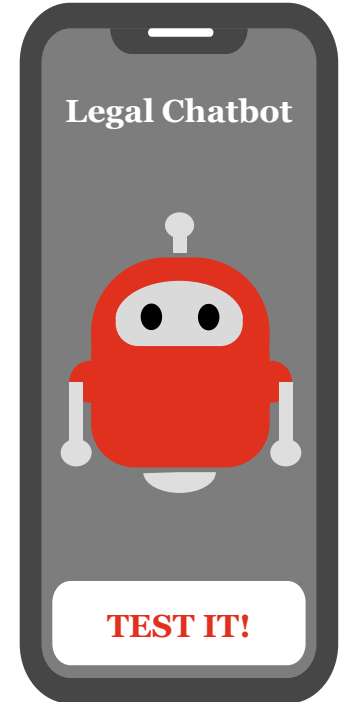

Implementation costs: **300k €**

Business value per year: 20-30k €

Time until break-even: **10-15 years**

Success of AI is determined by a company's level of maturity in its enabling factors

AI is not a tech-only topic only

1. Business Decisions & Analytics

2. Data & Information

3. Technology & Infrastructure

4. Organization & Governance

5. Process & Integration

6. Culture & Talent

A proper strategy makes the difference

Bot-only

Implementation costs: 300k €

Business value per year: 20-30k €

Time until break-even: 10-15 years

Implementation costs: 400k €

10 AI prototypes with similar effort

Business value per year: **200-300k €**

Key Takeaways

1

Think big! AI is a disruptor, not a fancy POC

2

Success of AI is determined by enabling factors, regulation is one of them!

3

Align with business and unit strategy and identify quick-wins and long-term goals => develop a strategy!
